

PROFESSIONAL OBJECTIVE

Full-stack developer with 3+ years of hands-on experience building production web applications, now applying that engineering foundation to **cybersecurity**. My development background gives me a practical understanding of how applications are built — and how they can be exploited. Passionate about threat detection, web application security, and building a career at the intersection of software engineering and cybersecurity. Actively pursuing certifications and seeking an entry-level **SOC Analyst or Application Security role**.

CYBERSECURITY SKILLS & KNOWLEDGE

Networking & Protocols: TCP/IP, UDP, OSI Model, DNS, DHCP, VPN, Firewalls, Subnetting, Network Devices (routers, switches, hubs)

Security Fundamentals: Malware types & behavior (ransomware, trojans, worms, spyware), attack vectors, threat prevention basics

Tools & Platforms: Cisco Packet Tracer, Linux CLI, Windows CMD/PowerShell

Certifications / Courses: Cisco Packet Tracer (certified) | CompTIA Network+ (in progress) | Cisco Networking Basics (in progress)

Currently Studying: SOC workflows, incident detection basics, log analysis concepts, SIEM fundamentals

TECHNICAL SKILLS

Languages: Java | Python | JavaScript | SQL

Frameworks & Tools: MERN Stack | JWT | Tailwind CSS | Git | GitHub

Databases: MongoDB | MySQL | PostgreSQL

EXPERIENCE

MERN-Stack Developer Intern | Excelsior Technologies

Dec 2024 – Present

- Contributed to 3 full-stack projects, collaborating with cross-functional teams to deliver scalable web solutions.
- Gained practical exposure to secure authentication (JWT), API security, and data handling best practices.
- Developed understanding of web vulnerabilities through hands-on backend development, relevant to web application security.

PROJECTS

LMS – Full-Stack Web Application | *React, Node.js, Express, MySQL, Tailwind* | github.com/archishah61/LMS

- Built a full-stack Learning Management System with AI-powered features including course generation, interview prep, math solver, paragraph writing, and roadmap builder.
- Implemented student-side features like course enrollment, progress tracking, quizzes, assignments, challenges, contests, streaks, and JWT-secured authentication with Multer for file uploads.
- Designed admin analytics dashboard for platform-wide insights with full course and student management using React Query for optimized data fetching.

Wanderlust – Full-Stack Web Application | *Node.js, Express, MongoDB, HTML/CSS* | wanderlust.com

- Built a full-stack Airbnb-style platform with secure user authentication and session management using JWT.
- Includes **secure login capabilities** and **seamless integration** of front-end and back-end functionalities.
- Offers key features for an Airbnb clone, such as **listing, search filters, secure booking system, real-time availability, and reviews and ratings**.

EDUCATION

Lok Jagruti Institute of Engineering & Technology, Ahmedabad

Nov 2022 – May 2026

- B.tech – Computer Science Engineering | CGPA: 8.5

K.R.Raval School, Ahmedabad

May 2022

- Class XII | 85.36
